# Foreword

Recently there has been a noticeable increase in the amount and variety of instructional materials available for educational purposes. These resources afford the instructor new opportunities to stimulate interest and make the learning process more meaningful. This guide has been developed to acquaint the instructor of business and distributive education subjects with some of the instructional aids that will permit him to do a more effective and satisfying job of teaching. This is not to be considered an exhaustive list nor interpreted as an official list of titles recommended by the State Education Department.

Appreciation is expressed to Herman Kerman, instructor in the Poughkeepsie Public Schools, for his efforts in compiling these instructional materials. Also the Bureau wishes to acknowledge the assistance of Audna T. Clum, librarian for the Averill Park Central Schools, for additional research related to the project. Catherine M. Bailey and William C. Flannigan, Associates in the Bureau of Classroom Communications, aided greatly in locating resource materials. Assistance relating to content was provided by Eugene P. Whitney, Associate in the Bureau of Business and Distributive Education. The project was coordinated, edited, and prepared for publication by Nelson S. Maurer, Associate in the Bureau of Continuing Education Curriculum Development.

# Message to Instructors

The publication is divided into three main sections. In the first section the titles are arranged by major areas of subject matter and are divided into films, filmstrips, transparencies, charts, tapes, and records. Following the title the producer or agency for whom the item was made is listed and, when known, the release date is given. The length of a film or filmstrip is given in minutes or number of frames. Also the item is indicated as silent or sound and in color or black and white. Unless otherwise specified all films are 16 millimeter and all filmstrips 35 millimeter. To assist in securing the item, the source for either purchase, free distribution, or rental is given by code. This is usually followed by a short annotation to help determine the appropriate use of the listing. The names and addresses of producers and distributors are listed alphabetically by code in the next section and for easy cross-reference by name only in the last section.

To be used effectively audiovisual materials need to be selected carefully, related appropriately to the lesson, and presented skillfully. Preview each item before it is used to see that it will accomplish the desired results. Make arrangements with school personnel to have properly operating equipment delivered to the classroom prior to the time it is needed. Before the presentation discuss with the class or individual the points that are emphasized in the media. After the presentation design followup activities to assure that the important concepts or skills have been understood.

It is important to keep informed of new instructional aids that are constantly being made available to schools. Current releases of related audiovisual aids are usually listed in issues of such publications as *Balance Sheet*, *Business Education World*, and *Journal of Business Education*. Use the latest editions of *Educators Guide to Free Films*, *Free Tapes*, *Free Filmstrips*, and *Free and Inexpensive Learning Materials* as sources for additional instructional materials. Indexes such as *Educational Media Index #4*, *Index to 16 mm Educational Films*, and *Index to 35 mm Educational Filmstrips* are also useful for locating teaching aids. Since many 16 mm films are being put on 8 mm stock, it is advisable to determine if a film is available in the smaller size and also compatible with your equipment. An index like the *8 mm Film Directory* is useful for locating such titles.

Instructors are encouraged to communicate to this Bureau their experiences using the aids listed and to suggest additional materials that might be included in a subsequent revision of this publication.

**Business law. ERAS. 30 reels.**  
P-ERAS.

Presents 60 lectures to be used with any textbook.

## Office Machines

### Films

**Accounting machine: collator calculator.** SF. 1968. 14 min. sd. color. P-SF. R-BEF.

Deals with the last step in punch card data processing.

**Computer glossary.** IBM. 1968. 19 min. sd. color. F-IBM.

Defines in basic terms the terminology of computers.

**Computer logic.** NF. 1962. 13 min. sd. b&w. P-NF. R-NF.

Explains the binary number system, defines the several meanings of logic as applied to computers and shows the difference between decimal and binary number systems.

**Computer units.** NF. 1962. 24 min. sd. b&w. P-NF. R-NF.

Gives an introduction to the major units of a digital computer.

**Computers come to marketing.** UNIVAC. 33 min. sd. b&w. F-UNIVAC.

Discusses the use of computers in the marketing process.

**Data processing: introductory principles.** SF. 1968. 14 min. sd. color. P-SF. R-BEF.

Introduces the use of the "card" in punched card data processing.

### Films

**Duplicating by the spirit method.**

BAILEY. 1961. 14 min. sd. color.

R-BEF, SUNYB, SYRCU, INDU, UILL.

Demonstrates the preparation of a master carbon, methods of making changes and corrections, and machine operation and care.

**The 418.** UNIVAC. 1964. 6 min. sd. color. F-UNIVAC.

Describes the features and operation of the machine.

**Full-key adding machine.** NCR. 25 min. sd. color. F-NCR.

Describes the features and operation of the machine.

**IBM 1404 printer.** IBM. 1962. 8 min. F-IBM.

Illustrates the features of the 1404 chain printer for the 1401 data processing system.

**IBM system/360 card processing power.** IBM. 1964. 10 min. sd. color. F-IBM.

Shows the efficient handling of card processing applications and the input-output devices available with the system.

**IBM tele-processing—right now.** IBM. 1964. 9 min. sd. color. F-IBM.

Demonstrates the potential of communications equipment and gives an excellent review of communications concepts.

**The information machine.** IBM. 1958. 10 min. sd. color. F-IBM.

Shows the development of the electronic computer.

## Office Machines

### *Films*

The interpreter and control panel wiring. SF. 1968. 13 min. sd. color. P-SF. R-BEF.

Demonstrates the operation of the interpreter as the machine processes information.

Introduction to an electronic data processing center. NCR. 11 min. sd. color. F-NCR.

Shows the operation of an EDP center.

Introduction to digital computer techniques. NF. 1962. 16 min. sd. b&w. P-NF. R-NF.

Explains the historical origins of calculating devices and points out the differences between analog and digital computers.

Introduction to digital computers. UNIVAC. 1959. 35 min. sd. color. F-UNIVAC.

Outlines the basic functions of computers as input, control, arithmetic, memory, and output.

Logic by machines. NET. 1962. 30 min. sd. b&w. R-AF, SYRCU, INDU, UILL.

Provides a basic introduction to electronic computers and discusses how speed, cost, and effort favor the computer.

Man and computer-a perspective. IBMWTC. 1967. 20 min. sd. color. F-IBMWTC.

Presents some of the basic elements in data processing such as input, output, storage, and control with examples as to operations and functions.

### *Films*

Man and computer today. IBMWTC. 1967. 11 min. sd. color. F-IBMWTC.

Shows how man's progress down through the centuries has been greatly affected by the tools he has developed and the impact of the computer on our modern world.

Matter of form. MOORE. 23 min. sd. color. R-BEF.

Tells the history of business forms from the simple salesbook to the complex forms for electronic high speed printers and how each type may best be used by modern business.

A matter of some urgency. DIC. 19 min. sd. color. R-DIC.

Shows proper duplicating and copying procedures.

Mimeograph techniques. BAILEY. 1958. 15 min. sd. color. R-BEF, SYRCU, INDU, UILL.

Demonstrates the complete process of typing a mimeograph stencil, from proper cleaning and adjusting of the typewriter to the use of a mimeoscope for hand lettering.

Modern business machines. TAI. 20 min. sd. b&w. R-BEF, UILL.

Demonstrates many expensive machines not found in the classroom, including machines for dictating, filming, stenciling, folding, and lithographing.

NCR 160 desk model bookkeeping machine. NCR. 25 min. sd. color. F-NCR.

Describes the features and operation of the machine.

NCR 61 automatic cash register. NCR. 25 min. sd. color. F-NCR.

Describes the features and operation of the machine.

## Office Machines

### *Films*

**NCR 61 cash register.** NCR. 23 min.  
sd. color. F-NCR.

Describes the features and operation of the machine.

**NCR 33 accounting machine.** NCR.  
20 min. sd. color. F-NCR.

Describes the features and operation of the machine.

**NCR 315 data processing system.** NCR.  
25 min. sd. color. F-NCR.

Describes the features and operation of the 315 computer system.

**Once upon a punched card.** IBM. 1964.  
9 min. sd. color. F-IBM.

Gives the basic principles of punched card accounting.

**Printing card punch.** SF. 1968.  
13 min. sd. color. P-SF. R-BEF.

Follows a card through the entire process of recording data on the keypunch machine.

**Programming the keypunch.** SF. 1968.  
13 min. sd. color. P-SF. R-BEF.

Shows the preparation of several different program cards and the function of the star wheels.

**The reproducer.** SF. 1968. 14 min.  
sd. color. P-SF. R-BEF.

Demonstrates several card reproducing techniques.

**Response to the challenge.** NCR.  
15 min. sd. color. F-NCR.

Discusses the design and development of the NCR 400 electronic accounting machine.

**The sorter.** SF. 1968. 13 min. sd.  
color. P-SF. R-BEF.

Introduces the sorter and provides a visual analyses of its parts and their function.

### *Films*

**Story of the Century.** NCR. 30 min.  
sd. color. F-NCR.

Describes the features and operation of the Century computer.

**Systems.** IBM. 1966. 14 min. sd. b&w.  
F-IBM.

Provides a simple explanation of the way complex computers serve government, science, and industry.

**Ten-key adding machine.** NCR. 25 min.  
sd. color. F-NCR.

Describes the features and operation of the machine.

**Universal machine.** NET. 1962. 30 min.  
sd. b&w. R-SYRCU, INDU, UILL.

Explains that a computer is a universal machine and that it is capable of doing whatever man is capable of instructing it to do.

**Universe of numbers.** NET. 1962. 29 min.  
sd. b&w. R-SYRCU, INDU, UILL.

Discusses the history of computer development and explains in lay terms how a computer solves a problem.

**What do you want?** UNIVAC. 1960. 20 min.  
sd. color. F-UNIVAC.

Traces the development of the electronic computer.

**What is EDP?** IBM. 1961. 13 min. sd.  
color. F-IBM.

Explains input, storage, processing, and output of data and deals briefly with punched cards, paper and magnetic drums, and disk and tape storage.

*Filmstrips*

*Filmstrips*

**Automation in today's modern office.** FRIDEN. 54 fr. si. color. P-FRIDEN. F-FRIDEN.

Points out the importance of automation, its impact on industry and our economy, and the career opportunities it created.

**Basic data processing.** FRIDEN. 107 fr. si. color. P-FRIDEN. F-FRIDEN.

Shows how punched paper tape is used to simplify the handling of costly routines.

**Card punch training course.** GREGG. 12 fs. P-GREGG.

A series of filmstrips used in training touch operation of the card punch keyboard.

**The fluid duplicator.** DIC. 15 min. sd. color. P-DIC.

Shows how to operate and adjust a fluid duplicator.

**IBM 24-26 card punch operation.** ADV. 18 min. average. sd. color. P-ADV.

A set of nine filmstrips with synchronized sound-on-tape and each covering some aspect of the operation of the machine.

**The mimeograph.** DIC. 24 min. sd. color. P-DIC.

Discusses the operation and adjustments of a mimeograph machine.

**Offset and you.** DIC. 8 min. sd. color. P-DIC.

Tells the history of lithography from the lithographic stone to present day offset.

**Operating a floor model offset.** DIC. 17 min. sd. color. P-DIC.

Describes the operation and adjustments of the machine.

**Operating a table-top offset duplicator.** DIC. 11 min. sd. color. P-DIC.

Describes the operation and adjustments of the machine.

**Ten-key touch training course.** GREGG. 25 fs. P-GREGG.

A series of filmstrips used in training touch operation on all electric 10-key keyboard machines. Used with a controlled reader type projector.

**This business of numbers.** UNIVAC. 1960. 20 min. sd. color. F-UNIVAC.

Traces the use of arithmetic machines up to the development of electronic computers.

**Tips for the offset operator.** DIC. 10 min. sd. color. P-DIC.

Gives useful operating procedures for the offset machine.

**Una and the Univac.** UNIVAC. 1960. 16 min. si. color. F-UNIVAC.

Shows data processing from punched cards to today's computers.

*Transparencies*

**Business data processing fundamentals.** GREGG. 32 trans. color. P-GREGG.

A series of transparencies that covers common language media and mechanical and electronic data processing.

**Data processing.** VPD3M. color. Four volumes. P-VPD3M.

A series of transparencies that presents the theory and operations of data processing equipment without the need for expensive equipment.

## Office Machines

### *Transparencies*

**Introduction to computers. VAL.**

31 trans. P-VAL.

A series of transparencies that covers basic computer systems and concepts.

### *Charts*

**Data processing charts. TAI. Three.**

19" x 25". color. P-TAI.

Illustrates the use of data processing equipment for business needs.

### *Tapes*

**Business machine series-ten key.**

ERAS. Nine reels. P-ERAS.

A series of tapes that provides 18 lessons for use with any textbook.

**Card punch. IBMC. P-IBMC.**

Provides detail operating instruction for the 024, 026, and 029 IBM card punch.

**Operator training course, 24-26 card punch machine. MPC. P-MPC.**

A series of seven reels that provides basic instruction and practice in operating the card punch machine.

## *Personnel Management*

### *Films*

**The clerk.** NFBC. 1958. 27 min. sd. b&w. (Nature of work ser.) P-MGHT. R-BEF, SYRCU, INDU, UILL.

# Using Audiovisual Materials

Audiovisual materials are both a tool for teaching and an avenue for learning. While no particular amount of time is recommended for using audiovisual materials, it is suggested that they be used with a variety of learning activities and that the instructor not devote an entire class session to the use of such materials.

Audiovisual materials lend themselves well to bring about a high level of involvement. When working with adults, it is well to remember that much can be learned from each other. It is with the idea of getting people involved and having them make contributions, that these comments are made.

The following suggestions may assist the instructor as he prepares an overall plan for the use of audiovisual materials. The ideas presented should allow for a comprehensive coverage of the content and the efficient use of class time and include:

- Plan the Presentation (Organization and Methods)
- Prepare the Equipment and Materials
- Orient the Class (Background Material)
- Present the Lesson
- Summarize Concepts and Understandings
- Evaluate Knowledges Acquired
- Followup with Opportunities to Explore New Knowledges
- Return the Equipment and Materials

## *Plan the Presentation (Organization and Methods)*

Always preview any audiovisual material to become familiar with its content and to see that it correlates with the lesson. Adult students dislike "time fillers" and inappropriate presentations. While previewing, prepare comments which might answer such questions as:

- What is being illustrated?
- Why is the presented material important?
- What are the important terms and understandings being presented?
- What are some appropriate topics which could be used to stimulate class discussions?

## *Prepare the Equipment and Materials*

Request the required equipment several days ahead of time from the director of adult education or person in charge of audiovisual equipment. Then see that it is delivered prior to the starting of the class. Before the class begins, practice with the equipment until you feel comfortable using it. Arrange the room so that everyone can see and is comfortable. Have a screen ready and place it so that the least amount of outside light is

reflected onto it. The wall may be used, but a beaded screen is much more desirable. The larger the room and the larger the audience, the larger the screen that is needed. Be sure there is a table for the projector, an electrical outlet, and extension cord (the cord with the projector is usually short), and a spare projector lamp available in case the one in use fails.

If the class is held during the day, be sure the room can be darkened and ventilated. Check to see if the lights can be turned off without shutting off the power to the projector. At the conclusion of the presentation, allow the fan on the machine to cool the equipment for a few minutes before completely shutting off the power.

#### *Orient the Class (Background Material)*

Explain to the class what they will see. Discuss the more important terms used and indicate the main points to be presented.

#### *Present the Lesson*

Have the film threaded and projector ready for use. Stop the film or filmstrip for discussion as the need arises during the showing instead of waiting until the presentation has been completed. A filmstrip offers flexibility for it may be used as a whole or as a part whichever is appropriate to the lesson. It may also be stopped at any frame for discussion or questions. At the end of the showing give your comments and encourage discussion and questions from the students.

#### *Summarize Concepts and Understandings*

Itemize the important learnings on the chalkboard as they are contributed by the class. Allow time for the students to raise other questions which may lead to a more complete understanding. Encourage students to keep some kind of notation for future review.

#### *Evaluate Knowledges Acquired*

Prepare a list of questions which might assist students to evaluate how well they have learned the important points of the lesson. One approach might be for the teacher to present the question and pause for a few moments to allow the students to form their answers before responding. Interest could be generated by asking the students to keep track of their number of correct answers.

#### *Followup with Opportunities to Explore New Knowledges*

Introduce a few new topics for discussion which will motivate the students to project their understandings.

#### *Return the Equipment and Materials*

After the class is over make arrangements to return the equipment and school-owned audiovisual materials. For an item ordered from an out-of-school source, complete the required attendance report, prepare the material for mailing, and leave it so that it may be returned promptly.

*This booklet is published primarily for use in the schools of New York State, and free copies are available to New York State school personnel when ordered through a school administrator from the Publications Distribution Unit, State Education Building, Albany, New York 12224.*
